FULL SPECTRUM HEMP EXTRACT

MORE CBD IN EVERY DROP

2400mg CBD in 30ml bottle

1200mg CBD in 15ml bottle

Rational Hemp offers the **HIGHEST QUALITY** and concentration of any full spectrum CBD oil on the market and at the **LOWEST COST PER MG.**

Our whole plant tincture – with an organic hemp seed oil base – delivers phytonutrients including terpenes, chlorophyll, essential fatty acids and the full range of cannabinoids found in hemp. That is what creates the **ENTOURAGE EFFECT.**

CBD isolates are not the same.

Our oil is sourced from 8th generation **KENTUCKY** hemp farmers with proprietary seed and an in-house FDA-registered processing facility. This means **CONSISTENCY** and **QUALITY** in every bottle.

Rational Hemp is non-GMO, pesticide free, US Hemp Authority Certified and **SUSTAINABLY GROWN** using **ORGANIC** methods.

Rational Hemp is third-party **INDEPENDENT LAB TESTED** and every Certificate of Analysis (COA) is posted on our website and instantly reached from our packaging QR code.

COST. QUALITY. SUSTAINABILITY.
CONSISTENCY. TRANSPARENCY.

CBD MATH

We offer one product in two sizes – 2400mg of CBD in a 30ml/1 ounce bottle and 1200mg of CBD in a 15ml/.5 ounce bottle, with the same high-quality, high-density tincture in each. Rational Hemp retails for 4 to 5 cents per mg.

Most of our competitors dilute their CBD oil from 2400mg down to 1500mg, 1000mg and even as low as 300mg in a 30ml/1 ounce bottle – with retail prices ranging from 8 to 17 cents per mg.

Many people start with a daily dose of 20mg of CBD oil, then adjust it based on their needs. With a competitor's 300mg bottle they'd need **TWO DROPPERS** (each dropper holds 1ml) to get a 20mg dose and the bottle would have only 15 doses in it. To get the same dose with Rational Hemp's 2400mg bottle they'd need only a **QUARTER OF A DROPPER** and there would be 120 doses in the bottle. The math speaks for itself.

THE RIGHT DOSE AT THE RIGHT PRICE
